

EMAIL TO FAMILY MEMBERS TO INVITE THEM TO PARTICIPATE

Hi, I wanted to let you know about a research study that I am a part of. I can send (or email) you a brochure about it. It's about how family members may inherit a specific kind of heart disease called Dilated Cardiomyopathy or DCM, and what you can do about it. I would like you to consider being a part of this study. It would help all of us in our family to have your participation. Can the study team contact you to explain what would be needed from you if you decide to participate? You can also contact study staff directly at [877-800-3430](tel:877-800-3430) or DCM.Research@osumc.edu.

Yours truly,
