

# DCM Precision Medicine Study

## PHONE SCRIPT TO FAMILY MEMBERS TO INVITE THEM TO PARTICIPATE

Hi, how are you?

I am calling because I just agreed to be in a research project to help our family and other families like ours learn about a specific heart disease called Dilated Cardiomyopathy, or DCM.

The researchers at The Ohio State University want to contact you to tell you about it and to ask for your help.

I told them that I would reach out to our family and ask if it was OK with you to let the research team contact you. Your participation would be good for our family. It would also help other families like ours.

Is it ok to give them your contact information? They will explain the study and what you need to do if you decide to participate. You can say yes or no when you talk with them.

You can also contact study staff directly at [877-800-3430](tel:877-800-3430) or [DCM.Research@osumc.edu](mailto:DCM.Research@osumc.edu).
